

**Remarks****I. Summary of Examiner interview held July 17, 2007**

Applicants thank the Examiner for a helpful and courteous telephonic interview on July 17, 2007, during which the Office Communication dated June 19, 2007, was discussed. During the interview, the apparent discrepancy between the specification in the Examiner's file wrapper and the specification page numbers referenced in Applicants' response of March 21, 2007, was discussed. Applicants clarified that no new matter has been introduced to the specification, as originally filed, and that Applicants' references were with respect to the published International patent application. Thus, any page and line numbers referenced to provide support in the specification, for the amendments previously submitted on March 21, 2007, which was submitted in reply to the Non-Final Office Action dated November 21, 2007, are from the publication of International Application Number PCT/GB00/00876 (International Publication Number WO 00/54057). For example, in the above International application publication, Example 4 begins on page 38, where the number 38 is also centered in the header.

**II. Conclusion**

Applicants respectfully request consideration and allowance of amended claims 1, 4, 5 and 7-17 that were submitted in the response dated March 21, 2007. Examiner Gabel is encouraged to contact the undersigned concerning any questions about the present application.

Respectfully submitted,

Henry N. Wixon  
Attorney for Applicants
